

Environmental Management Policy

The management of BRC is committed to the ultimate goal of operating a safe, efficient and environmentally aware organisation that generates sufficient resources for sustained growth.

This goal can only be achieved if customers are provided with the products and services they need, when they need them, at a price which is perceived as good value and if the company successfully manages its processes in a safe, systematic and efficient manner at the same time as minimising any effects on the environment.

All sites shall;

- implement and maintain an environmental management system that meets the requirements of BS EN ISO 14001.
- develop and implement systems that ensure compliance with all regulatory requirements, specific customer requirements and recognised standards, including industry specific environmental schemes.
- integrate environmental considerations into all company processes from purchasing through to supply.
- seek to reduce all undesirable impacts on the environment through the reduction in the use of material and energy resources and the reduced generation of waste products.
- be committed to the prevention of all forms of pollution.
- promote a positive and responsible attitudes on environmental matters to employees, suppliers and customers.
- seek to continually improve the business systems in order to reduce all environmental effects.

This policy sets out a framework for establishing specific environmental objectives and targets for the company. The policy and the associated environmental objectives shall be reviewed by the management at periodic intervals.
